

Subject Index 2008

- A_{1c} levels
 Advanced Insulin Management program, 59
 commentary, 56
 weight change in intensive insulin therapy and, 219
- ADA/EASD consensus algorithm, 126, 204
- Advanced Insulin Management program, 59
- American Diabetes Association annual scientific session updates, 122, 141, 143
- Basal insulin
 basal-bolus insulin therapy, 95
 options in basal insulin, 146
- Carbohydrate counting basics (patient handout), 117, 119
- Cardiovascular risk factors, obesity, type 2 diabetes mellitus, coronary disease (case study), 111
- Clinical management strategies, postprandial and fasting plasma glucose, 15, 17, 28, 29
- CME information
 American Diabetes Association annual scientific session updates, 122, 141, 143
 incorporating postprandial and fasting plasma glucose into clinical management strategies, 15, 17, 28, 29
 inpatient insulin therapy, 150, 164, 165
- CME test questions
 American Diabetes Association annual scientific session updates, 141, 143
 incorporating postprandial and fasting plasma glucose into clinical management strategies, 28, 29
 inpatient insulin therapy, 164, 165
- Commentary
 ADA/EASD consensus algorithm, 204
 basal insulin options, 146
 decrease in A_{1c}, 56
 4-T trial, 2
- Coronary disease, obesity, type 2 diabetes mellitus, cardiovascular risk factors (case study), 111
- Council for the Advancement of Diabetes Research and Education, 244
 editorial, 55
Diabetes Tactics, 114, 196, 244
- Diabetes
 Type 1
 Advanced Insulin Management program, 59
 diagnosis, 238
 formula for initiation of insulin therapy, 189
 managing for pregnancy (patient handout), 199, 201
 preconception counseling (case study), 192
 pregnancy loss and neonatal death, 167
 Type 2
 ADA/EASD consensus algorithm, 126
 basal-bolus insulin therapy, 95
 decrease in A_{1c} levels (commentary), 56
 4-T trial (commentary), 2
 glyburide/metformin, increased blood glucose (case study), 241
 insulin (human recombinant) and metformin (case study), 48
 metformin/glyburide, increased blood glucose (case study), 241
 obesity, cardiovascular risk factors, coronary disease (case study), 111
 oxidative stress, 176
 postprandial physiology and pathogenesis of, 132
 pregnancy loss and neonatal death, 167
 quality of life and insulin therapy, 31
 South Asia, 78
 U-500 insulin, 211
- Diabetes-related distress, 59
- Diabetes Tactics*, 114, 196, 244
- Diagnosis, 238
- Editorials, 1, 55, 124, 145, 240
- Endothelial function and insulin, 185
- Epidemiology, type 2 diabetes in South Asia, 78
- European Association for the Study of Diabetes, 44th Annual Meeting, 208
- 4-T trial (commentary), 2
- Fasting plasma glucose, clinical management strategies and, 15, 17, 28, 29
- Glucose
 control (editorial), 124
 fasting plasma glucose and postprandial glucose, 15, 17, 28, 29
 increased, type 2 diabetes mellitus, glyburide/metformin (case study), 241
- Glucose meters, accuracy, 5
- Glyburide/metformin, type 2 diabetes mellitus, increased blood glucose (case study), 241
- Hyperglycemia management, IV insulin guidelines and, 67
- Inpatient insulin therapy, 152
- Insulin
 action, variability of, 37
 basal-bolus insulin therapy, 95
 endothelial function and, 185
 formula for initiation of therapy, 189
 human recombinant and metformin (case study), 48
 inpatient insulin therapy, 152
 intensive insulin therapy, 219
 IV insulin guidelines, 67
 quality of life, 31
 requirements, lifestyle factors and (patient handout), 51, 53

- safety needles, 232
- U-500 insulin and severe insulin resistance, 211
- Insulin resistance, U-500 insulin and, 211
- IV insulin guidelines, 67
- Lifestyle factors, insulin requirements and (patient handout), 51, 53
- Metformin and insulin (human recombinant) (case study), 48
- Needlestick injuries among nurses, 232
- Neonatal death, 167
- Nurses, needlestick injuries among, 232
- Obesity, type 2 diabetes mellitus, cardiovascular risk factors, coronary disease (case study), 111
- Oxidative stress, 176
- Pathogenesis, 132
- Patient handouts (English/Spanish)
 - carbohydrate counting basics, 117, 119
 - lifestyle factors and insulin requirements, 51, 53
 - losing weight with diabetes, 247
 - managing type 1 diabetes for pregnancy, 199, 201
- Postprandial glucose, clinical management strategies and, 15, 17, 28, 29
- Postprandial physiology, 132
- Pregnancy
 - loss and neonatal death, 167
 - managing type 1 diabetes for (patient handout), 199, 201
 - preconception counseling in type 1 diabetes mellitus (case study), 192
- Primary care practitioners, ADA/EASD consensus algorithm and, 126
- Quality of life, insulin therapy and, 31
- Safety needles, 232
- South Asia, type 2 diabetes in, 78
- Variability of insulin action, 37
- Weight
 - Advanced Insulin Management program and weight gain, 59
 - intensive insulin therapy and weight change, 219
 - losing weight with diabetes (patient handout), 247
 - management in basal-bolus insulin therapy, 95
- Women
 - managing type 1 diabetes for pregnancy (patient handout), 199, 201
 - pregnancy loss and neonatal death with diabetes, 167
